Outline of Business

- Production of machining parts for aerospace and assembly for aircraft.
- Design and development and production of GSE for aircraft.

Our Strengths

- IAC has 31 CATIA units and our 5-axis machining machine holds 52 units. Thus, we can process all parts including those with complex shape, and can perform 5-axis processing of large parts of up to 18m. Our Malaysia factory undertakes surface treatment and paint work. Thus, we can handle the whole process of material purchasing, machining, surface treatment, painting and sub-assembly.
